

Education Redesigned

In a world that's becoming increasingly complex, where success is driven not only by what you know but by what you can do with what you know, it's more important than ever for our youth to be equipped with the knowledge and skills to solve tough problems, gather and evaluate evidence, and make sense of information. These are the types of skills that students learn by studying science, technology, engineering, art, and math—subjects collectively known as STEAM.

Yet today, few American students pursue expertise in STEAM fields—and we have an inadequate pipeline of teachers skilled in those subjects. HDG.University is the solution!

Why HDG.University?

The mission of HeyDesignGuy University is to integrate and deepen the impact of STEAM education, outreach and collaboration between minority students and thought leaders.

Our Vision

HDG.University is a 501(c)3, education-based non-profit organization merging art and creativity with early childhood learning. We offer engaging opportunities and collaborations to enrich and expand the lives of underserved students, parents, and educators through fun-filled activities, coloring books, games, and events focused on science, technology, engineering, art, and math.

Stay tuned. Redesigning education begins the summer of 2019!
